

March 2025

Financial Centre Futures

In March 2007, Z/Yen and the City Of London released the first edition of the GFCI, which continues to provide evaluations of competitiveness and rankings for the major financial centres around the world. We are pleased to present the thirty-seventh edition of the Global Financial Centres Index (GFCI 37).

In July 2016, Z/Yen and the China Development Institute (CDI) in Shenzhen established a strategic partnership for research into financial centres. We continue our collaboration in producing the GFCI. The GFCI is updated every March and September and receives considerable attention from the global financial community. The index serves as a valuable reference for policy and investment decisions.

Z/Yen is the City of London's leading commercial think-tank, founded in 1994 to promote societal advance through better finance and technology. Z/Yen has built its practice around a core of high-powered project managers, supported by experienced technical specialists so that clients get expertise they need, rather than just resources available.

The CDI is a leading national think-tank that develops solutions to public policy challenges through broad-scope and in-depth research to help advance China's reform and opening-up to world markets. The CDI has been working on the promotion and development of China's financial system since its establishment in 1989. Based on rigorous research and objective analysis, CDI is committed to providing innovative and pragmatic reports for governments at different levels in China and corporations at home and abroad.

The authors of this report, Mike Wardle and Professor Michael Mainelli, would like to thank Bikash Kharel, Sasha Davis, Rafael Kapose, Carol Feng, Peng Yu, and the rest of the GFCI team for their contributions with research, modelling, and ideas.

Foreword

Warm greetings from the Seoul Metropolitan Government. I am Oh Se-hoon, the Mayor of Seoul.

First of all, allow me to extend my heartfelt congratulations to the global consulting group Z/Yen on its release of the 37th edition of the Global Financial Centres Index (GFCI).

In September 2024, Seoul ranked 11th overall in the 36th edition of the GFCI. In the latest 37th edition, Seoul moved up one spot, entering the top 10 – an achievement that reflects the stability and resilience of its financial market.

Moreover, Seoul is enhancing both citizen convenience and urban competitiveness through various cutting-edge fintech services, such as the 'Climate Companion Card' and the 'Wrist Doctor 9988', leveraging its world-class ICT industry.

Recently, Seoul announced its private sector-led economic growth strategy called 'KOGA (KOrea Growth Again)'. We will strive to foster high-tech industries by expanding infrastructure for futureoriented industries and increasing R&D investments, and we will also pursue regulation reform to keep pace with rapid technological advancements. Furthermore, we will aim to promote the integration of various advanced industries such as AI with fintech, through financial innovation, and we will also aim to create a business-friendly financial environment.

We look forward to your continued interest and support, as Seoul advances toward becoming a global financial hub, attracting even more international businesses, capital, and talent.

Thank you.

Oh Se-hoon Mayor of Seoul

GFCI 37 Summary & Headlines

Overview

We researched 133 financial centres for this edition of the Global Financial Centres Index (GFCI 37). The number of centres in the main index is 119. Fourteen associate centres are close meeting the criteria required for inclusion in the index.

As in the last edition of the index, there is little change in the ranking of the leading centres, with the top nine centres remaining unchanged. In the top 20 centres, Amsterdam rose nine places to 18th and Dubai rose four places to 12th position. This continues to suggest no major change in the economic outlook across the leading economies in the world, with slow but continued growth and inflation falling. Overall, the rating for almost all centres improved, with the average rating across all centres up just over 2%, which suggests stronger confidence in the financial sector in this period. The largest increase in average ratings was in Eastern Europe & Central Europe, at 2.48% and the lowest was in North America where average ratings rose by 1.41%.

Forty-nine centres rose in the rankings, 18 maintained their position from GFCI 36, and 52 fell. Eight centres fell 10 or more places, while seven centres rose 10 or more places. The largest improvements were achieved by Rome, up 19 places, Stockholm, up 16 places, Vienna, up 16 places, and Monaco, up 15 places. It is worth noting that some centres are more sensitive to changes in ratings and instrumental factor data as discussed in the section on stability on pages 35 and 36 of this report.

For this edition of the GFCI, we have researched the key challenges facing international financial centres in the medium term. Geo-Political challenges are clearly seen as the most important risk, mentioned by 18% of respondents (lower than the 20% in GFCI 36). Competition from other centres and Changing regional/national priorities were mentioned by 15% and 13% of respondents respectively.

GFCI 37 Results

Leading Centres

- New York leads the index, with London second. Hong Kong retains third position ahead of Singapore.
- San Francisco, Chicago, Los Angeles, Shanghai, and Shenzhen are unchanged in fifth to ninth positions. Seoul re-entered the top 10 centres in this edition of the index.

Western Europe

- London continues to lead in the region, with seven Western European centres featuring in the top 20 in GFCI 37.
- The average rating across this region increased by 2.14%.
- All centres other than Reykjavik rose in the ratings in comparison with GFCI 36.

Asia/Pacific

- Six Asia/Pacific centres feature in the world top 20, and the average rating for this region is up 2.06%.
- All centres in the region improved their rating. Hangzhou, New Delhi, Kuala Lumpur, Ho Chi Minh City, Manila, and GIFT City-Gujarat rose six or more rank places. Dalian fell 9 rank places.

North America

- New York, San Francisco, Chicago, and Los Angeles remain in the world top 10, with Washington DC and Boston also in the top 20.
- On average, ratings for centres in this region rose 1.41%.
- All centres other than San Diego improved their ratings, and Miami and Vancouver rose 10 or more places in the rankings.

Eastern Europe & Central Asia

- Astana remains in the lead position in the region, followed by Tallinn and Cyprus.
- The average rating change across this region was an increase of 2.48% with all centres other than Prague improving their rating.
- Eight centres fell in the rankings, with Prague falling 13 rank places. Riga rose nine rank places.

Middle East & Africa

- Dubai and Abu Dhabi continue to take first and second places in the region, with Dubai rising four rank places to 12th in GFCI 37.
- Casablanca takes first place and is the leading African centre, while Mauritius ranks fourth in the region, ahead of Tel Aviv.
- The average rating change across this region was an increase of 1.64%.
- Tel Aviv, Kuwait City, and Johannesburg each fell more than 10 ranking places.
- Tel Aviv was the only centre to fall in the ratings.

Latin America & The Caribbean

- Sao Paulo rose seven rank places to take the lead in the region. British Virgin Islands and Trinidad & Tobago also rose in the ratings, and Buenos Aires was level, while other centres fell in the rankings.
- Average ratings in the index improved by 2.23% in the region, with all centres rising in the GFCI ratings.

FinTech

- We are able to assess 115 centres for their Fintech offering.
- New York retains its leading position in the Fintech ranking, followed by London and Shenzhen. Hong Kong rose five rank places, overtaking US centres and Singapore to take fourth position.
- Oslo, Mauritius, and Riyadh improved by over 20 places in the Fintech rankings. Six centres fell more than 15 places.

GFCI 37

- GFCI 37 was compiled using 140 instrumental factors. These quantitative measures are provided by third parties including the World Bank, the OECD, and the UN. Details can be found in Appendix 4.
- The instrumental factors were combined with 31,314 assessments of financial centres provided by 4,946 respondents to the GFCI online questionnaire. A breakdown of the respondents is shown in Appendix 2.
- Further details of the methodology behind GFCI 37 are in Appendix 3.

Associate Centres

We track centres that have yet to achieve the number of assessments required to be listed in the main GFCI index. Fourteen centres fall into this 'associate centres' category, with Labuan, Philadelphia, Abuja, and Fukuoaka closest to receiving the 150 assessments required to be listed in the index.

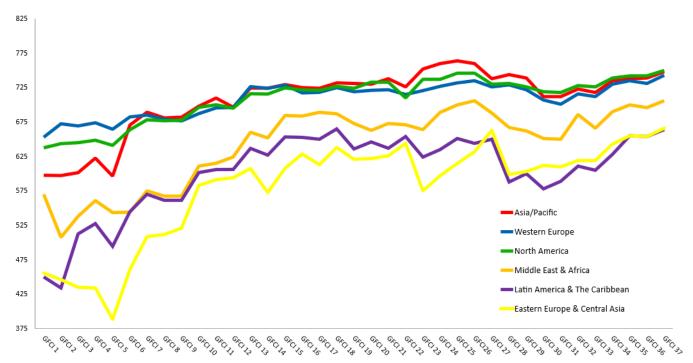

Table 2 | GFCI 37 Associate Centres

| Centre | Number Of Assessments In The Last 24 Months | Mean Of Assessments |
|-------------------|--|---------------------|
| Labuan (Malaysia) | 92 | 717 |
| Philadelphia | 70 | 709 |
| Abuja | 43 | 516 |
| Fukuoka | 40 | 738 |
| Turks and Caicos | 37 | 614 |
| Karachi | 35 | 631 |
| Bishkek | 34 | 524 |
| Vilnius | 20 | 730 |
| Tashkent | 18 | 511 |
| Chisinau | 17 | 565 |
| Bartislava | 17 | 482 |
| Gothenburg | 15 | 633 |
| Andorra | 15 | 627 |
| Kaunas | 11 | 582 |

Regional Performance

The mean rating of the top five North American centres remains slightly ahead of the same measure for the leading Asia/Pacific centres in GFCI 37. Leading Western European centres follow close behind.

The Top Five Centres

New York continues to have a clear lead over second place London in the index, but London and Hong Kong have closed the gap a little. Singapore and San Francisco remain in fourth and fifth places, with San Francisco just one rating point behind Singapore.

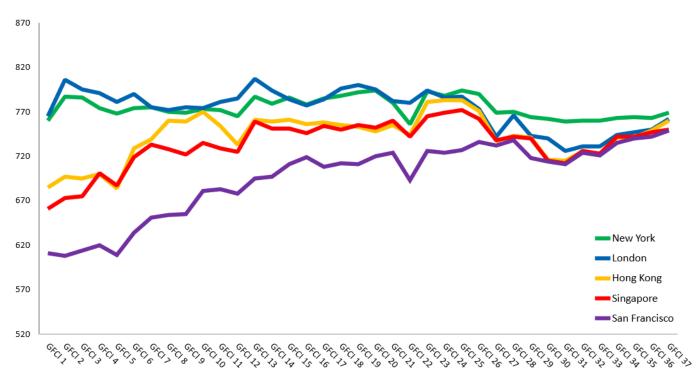

Chart 2 | The Top Five Centres - GFCI Ratings Over Time

"The competitiveness of a financial centre depends heavily on a well-balanced regulatory environment, low corruption levels, and robust rule of law. Jurisdictions that excel in these areas foster trust, attract global investment, and position themselves as leaders in the financial industry. However, weaknesses in any of these domains can erode confidence and hinder a financial centre's growth."

CHIEF OPERATIONS OFFICER, ASSET MANAGEMENT FIRM, MAURITIUS

Future Prospects

The GFCI questionnaire asks respondents which centres they consider will grow in significance over the next two to three years. Among the top 15, seven are in the Asia/Pacific region while six others are in the Middle East & Africa—highlighting the increasing importance of these regions in global finance.

| Table 3 | The 15 Centres Likely To Become More Significant |
|---------|--|
|---------|--|

| Centre | Mentions in last 24 months |
|------------|----------------------------|
| Dubai | 63 |
| Seoul | 48 |

"Strong regulatory frameworks and legal systems inspire confidence. Transparent regulations, consistent enforcement, and low corruption are crucial for attracting international business and protecting investors."

ASSISTANT GENERAL MANAGER, INSURANCE FIRM, HONG KONG

Areas Of Competitiveness

The instrumental factors used in the GFCI model are grouped into five broad areas of competitiveness: Business Environment, Human Capital, Infrastructure, Financial Sector Development, and Reputation. These areas and the instrumental factor groups which comprise each area are shown in Chart 3.

"The availability of a highly skilled workforce is crucial for the competitiveness of financial centres. Skilled professionals, such as financial analysts, IT experts, and regulatory specialists, drive innovation and efficiency within financial institutions. Additionally, flexible labour markets that allow for easy hiring and mobility of talent enhance a financial centre's ability to adapt to changing market conditions and technological advancements. Together, these factors create a dynamic and resilient financial environment that attracts global businesses and investors."

SENIOR VICE-PRESIDENT, INVESTMENT FIRM, TOKYO

To assess how financial centres perform in each of these areas, the GFCI factor assessment model is run separately for each of the five areas of competitiveness. New York takes the lead position in all five areas and London and Hong Kong share second and third places. Singapore, Shanghai, San Francisco, and Shenzhen feature in the top five in one or more of the areas of competitiveness.

| Rank | Business Environment | Human Capital | Infrastructure | Financial Sector Development | Reputational & General |
|------|-----------------------------|---------------|----------------|---------------------------------|---------------------------|
| 1 | New York | New York | New York | New York | New York |
| 2 | London | Hong Kong | Hong Kong | Hong Kong | London |

| 15 | Paris | Seoul | Frankfurt | Geneva | Washington DC |

Table 4 | GFCI 37 Top 15 Centres By Area Of Competitiveness

"Taxation used to play one of the crucial roles in business repatriation and relocation. However, current trends show that nowadays it remains a major factor, but not one of the most important ones when considering business activities."

ECONOMIC OFFICER, GOVERNMENT BODY, AMSTERDAM

Industry Sectors

We investigate the differing assessments for relevant industry sectors by building the index separately using only the responses provided by people working in those industries. This creates separate sub-indices for Banking, Investment Management, Insurance, Professional Services, Government & Regulatory, Finance, FinTech, and Trading.

New York and Hong Kong rank first in three categories each, with London taking first place in banking, and Singapore for professional services. London, Hong Kong and Singapore continue to perform well across the board. Shenzhen, Shanghai, Seoul, Zurich, Frankfurt, Los Angeles, and Dubai also feature in the top five in one or more of the sectors.

Table 5 | GFCI 37 Top 15 Centres by Industry Sector

| Rank | Banking | Investment Management | Insurance | Professional Services | Government & Regulatory | Finance | FinTech | Trading |
|------|------------------|--------------------------|---------------|--------------------------|----------------------------|------------------|------------------|------------------|
| 1 | London | Hong Kong | Hong Kong | Singapore | New York | Hong Kong | New York | New York |

Size Of Organisation

We have analysed how the leading centres in the index are viewed by respondents working for organisations of different sizes. Among the top five centres, Hong Kong leads in three categories, and New York in two. Singapore leads among people from organisations between 500 to 1,000 people and London leads among people from organisations with between 100 and 500 staff.

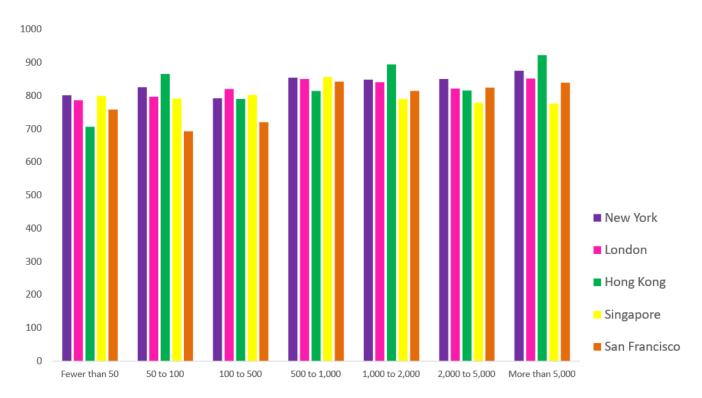

Chart 4 | GFCI 37 Average Assessments By Respondents' Organisation Size (Number Of Employees)

"Paris benefits from a rich pool of highly educated and skilled professionals, which is crucial for sustaining its position as a leading financial centre."

HEAD OF PARTNERSHIPS, FINANCE COMPANY, PARIS

Factors Affecting Competitiveness

The GFCI questionnaire asks respondents to indicate which factors of competitiveness they consider the most important at this time. The number of times that each area was mentioned and the key issues raised by respondents are shown in Table 6.

| Table 6 | GFCI 37 Main Areas Of Competitiveness |
|---------|---------------------------------------|
|---------|---------------------------------------|

| Area Of Competitiveness | Number Of Mentions | Main Issues |
|-----------------------------|-----------------------|--|
| Business Environment | • | A balanced regulatory framework is essential - providing transparency, stability and building trust that the system can prevent corruption. The rule of law and strong enforcement mechanisms are critical competitive factors. Regulatory complexity is increasing for financial centres . There is a need to balance investor protection against innovation while adapting to emerging |
| Human Capital | 189 | technologies like Web3 and AI. Access to skilled financial professionals, especially in emerging fields like AI, blockchain, and fintech, is critical with talent shortages a significant challenge requiring investment in education, training programs, and flexible immigration policies. Global talent mobility presents both opportunities and challenges, with financial centres competing internationally for skilled workers while facing issues like brain drain, varying immigration policies, and the need to create attractive environments, including cultural and educational opportunities. |
| Infrastructure | 182 | High-quality infrastructure—both physical and digital is fundamental to financial centres' competitiveness, enabling efficient operations, attracting businesses, and supporting global connectivity. Modern financial centres increasingly prioritize smart city technologies, green infrastructure, and sustainability practices. Major infrastructure challenges include funding gaps, maintenance of aging systems, unequal access across regions, and keeping pace with technological advancements. |
| Taxation | • | Competitive and transparent tax regimes are crucial for attracting international businesses. While taxation is important, it is no longer the sole deciding factor - regulatory clarity, and stability are increasingly significant alongside tax considerations. Financial centres must balance tax rates with international compliance standards, and avoid being labelled as "tax havens" while maintaining predictable taxation policies. |
| Reputation | 179 | City reputation and branding are crucial for attracting investments, businesses, and talent to financial centres, with factors like economic stability, regulatory soundness, and quality of life significantly influencing a city's competitiveness. Effective city branding requires highlighting unique strengths. Financial centres with strong reputations benefit from increased trust in their legal and regulatory systems, though the underlying ecosystem, innovation culture, and actual delivery of promises are ultimately more important than branding alone. |
| Financial Sector Developmen | | Accessibility to clients and suppliers is a crucial competitive factor for financial centres, with benefits including stronger business relationships, market reach, and operational efficiency. Financial centres are adapting to modern accessibility needs through digital solutions, and fintech innovations, though physical proximity matters less in the era of remote work and internet connectivity. Key challenges in accessibility include geographic barriers, market fragmentation, supply chain disruptions, and regulatory hurdles. |

Rule Of Law And Economic Freedom

Charts 5 and 6 illustrate the correlation between GFCI ratings and key indicators. Chart 5 compares ratings with the Economic Freedom of the World Index (Fraser Institute), while Chart 6 contrasts them with the Rule of Law Index (World Bank). These charts demonstrate the correlation of these factors with the GFCI 37 ratings (the size of the bubble indicates the relative GDP of each centre).

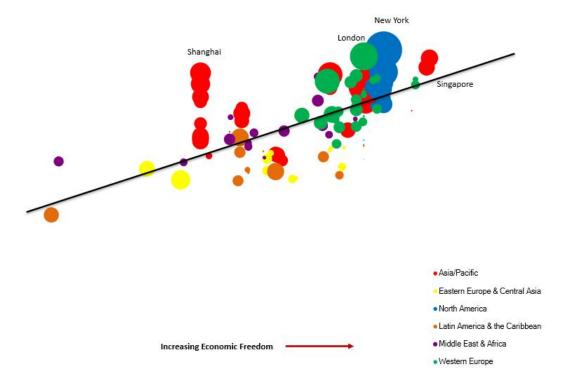

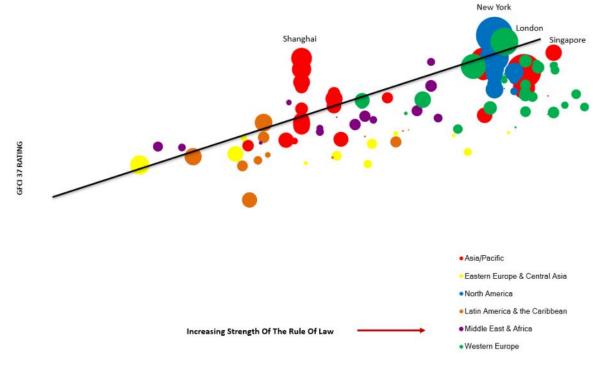

Chart 6 | GFCI 37 Rating Against the Rule Of Law Index (Supplied by the World Bank)

Connectivity

Financial centres thrive when they develop deep connections with other centres. The GFCI allows us to measure connectivity by investigating the number of assessments given to and received from other financial centres. Charts 7 and 8 show the different levels of connectivity enjoyed by Paris and Zurich to illustrate the differences. Paris has wider connections with other financial centres, including the leading centres, whereas Zurich has fewer connections to other centres.

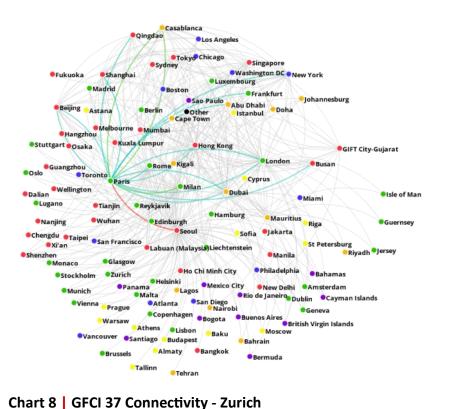

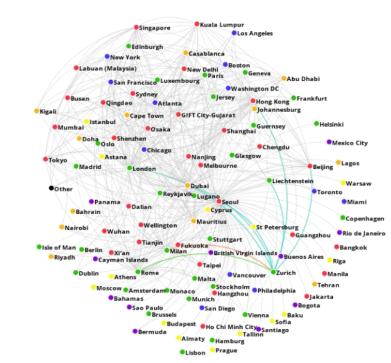

Chart 7 | GFCI 37 Connectivity - Paris

Financial Centre Profiles

Using clustering and correlation analysis we have identified three measures (axes) that determine a financial centre's profile along different dimensions of competitiveness.

'Connectivity' – the extent to which a centre is well connected around the world, based on the number of assessments given by and received by that centre from professionals based in other centres.

A centre's connectivity is measured by two factors: 'inbound' assessment locations (the number of places from which it receives assessments) and 'outbound' assessment locations (the number of other centres assessed by its respondents). If the weighted assessments for a centre are provided by 42% or more respondents from other centres, this centre is deemed to be 'Global'. If the ratings are provided by over 20.5% of other centres, this centre is deemed to be 'International'.

'Diversity'– the instrumental factors used in the GFCI model give an indication of a range of factors that influence the richness and evenness of areas of competitiveness that characterise any particular financial centre. We consider this span of factors to be measurable in a similar way to that of the natural environment. We therefore use a combination of calculations based on existing biodiversity measures (calculated on the instrumental factors) to assess a centre's diversity taking account of the range of factors against which the centre has been assessed – the 'richness' of the centre's business environment; and the 'evenness' of the distribution of that centre's scores. A high score means that a centre is well diversified; a low diversity score reflects a less rich business environment.

'Speciality' – the depth within a financial centre of the following industry sectors: investment management, banking, insurance, professional services, and the government and regulatory sector. A centre's 'speciality' performance is calculated from the difference between the GFCI rating and the industry sector ratings.

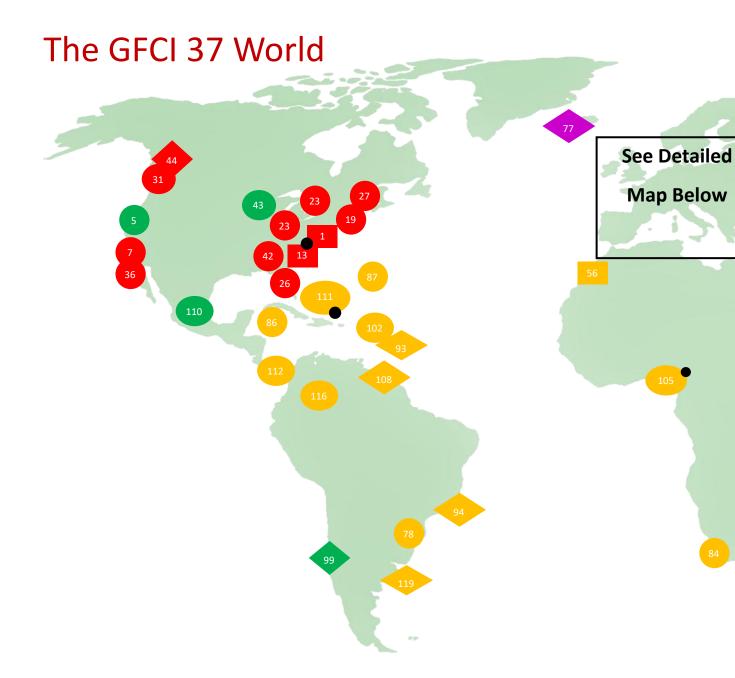

In Table 7, 'Diversity' (Breadth) and 'Speciality' (Depth) are combined on one axis to create a two dimensional table of financial centre profiles. The 119 centres in GFCI 37 are assigned a profile on the basis of a set of rules for the three measures: how well connected a centre is, how broad its services are, and how specialised it is.

The 10 Global Leaders (in the top left of the table) have both broad and deep financial services activities and are connected with many other financial centres. This list includes four of the top 10 global financial centres in GFCI 37, with the remainder mostly in the top 20 centres.

Table 7 | GFCI 37 Financial Centre Profiles

Regional Analysis

In our analysis of the GFCI data, we look at six regions of the world to explore the competitiveness of their financial centres. Alongside the ranks and ratings of centres, we look at trends in the leading centres in each region and investigate the average assessments received by regions and centres in more detail.

We display this analysis in charts which show:

- the mean assessment provided to that region or centre;
- the difference in the mean assessment when home region assessments are removed from the analysis;
- the difference between the mean and the assessments provided by other regions;
- the proportion of assessments provided by each region.

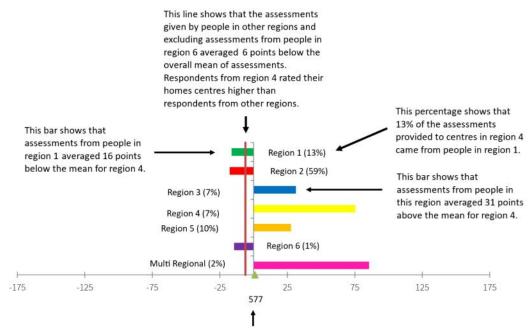

Charts 10 and 11 show examples of these analyses. Coloured bars to the left of the vertical axis indicate that respondents from that region gave lower than the average assessments. Bars to the right indicate respondents from that region gave higher than average assessments. It is important to recognise that assessments given to a centre by people based in that centre are excluded to remove 'home' bias.

The additional vertical axis (in red) shows the mean of assessments when assessments from the home region are removed. The percentage figure noted by each region indicates the percentage of the total number of assessments that are from that region.

"The availability of talent skilled in Web3, blockchain, AI, and fintech technologies will be crucial. Centres that invest in education and training to build a workforce adept in AI development, smart contracts, and decentralised finance (DeFi) will see their competitiveness rise. Flexible labour markets that support the gig economy, remote work, and evolving job roles in tech-driven sectors will also be important. Conversely, a shortage of skilled talent in these areas could inhibit growth and innovation."

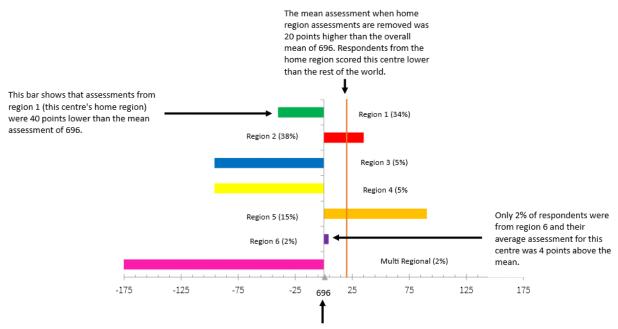

SENIOR SOLUTIONS ARCHITECT, CISO, GOVERNMENT ORGANISATION, DUBAI

Chart 10 | Example 1: Assessments Compared With The Mean For Region 4

This figure is the mean of all assessments for centres in region 4.

Chart 11 | Example 2: Assessments Compared With The Mean For An Individual Centre

The mean assessment for this centre was 696.

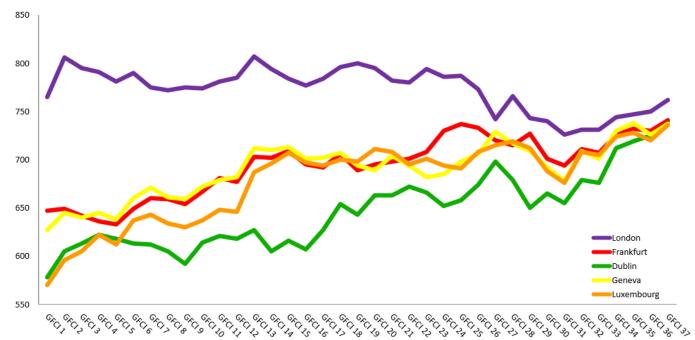

Western Europe

London leads the region. Six other Western European centres are in the top 20. Assessments provided by people in other regions were lowest from those in Latin America & The Caribbean. Respondents from Western Europe and Asia/Pacific were also lower that the global average.

Table 9 | Asia/Pacific Top 15 Centres In GFCI 37

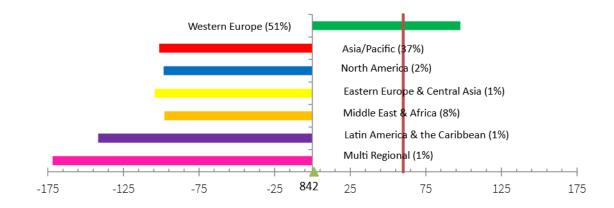

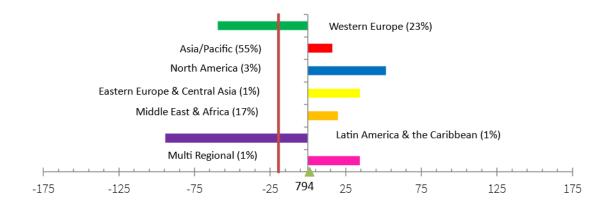

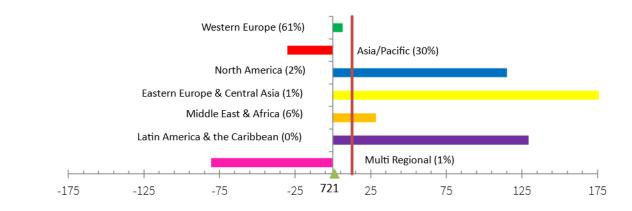

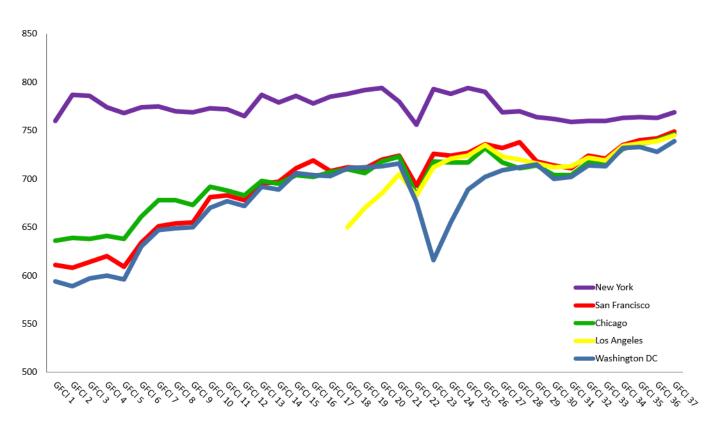

North America

New York continues to lead the index and San Francisco, Chicago, and Los Angeles also feature in the top 10. Miami and Vancouver gained 10 or more rank places while San Diego and Minneapolis/St Paul fell 10 or more places. Assessments of North American centres from people in the Asia/Pacific and North American regions, and from those with a multi regional presence were above the global average, while assessments from other regions were lower.

The Middle East & Africa

Dubai and Abu Dhabi continue to take the lead in the region, followed by Casablanca, which remains the leading centre in Africa. Tel Aviv, Kuwait City, and Johannesburg all fell 10 or more places in the rankings. Western Europe, North America, and from Eastern Europe & Central Asia were above the global average. Along with those from people with a multi-regional presence.

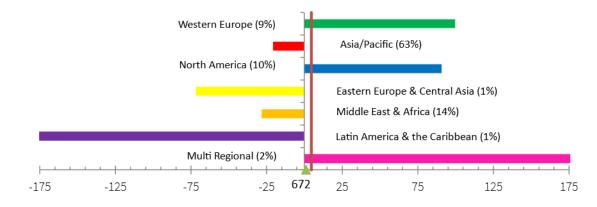

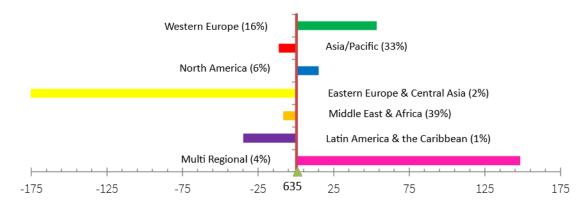

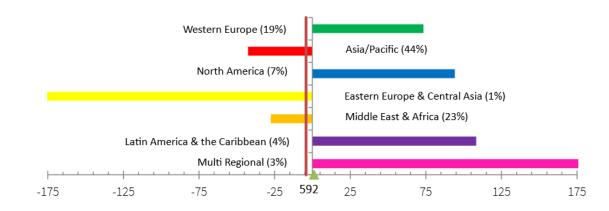

Chart 40 | Assessments By Region For Cayman Islands - Difference From The Overall Mean

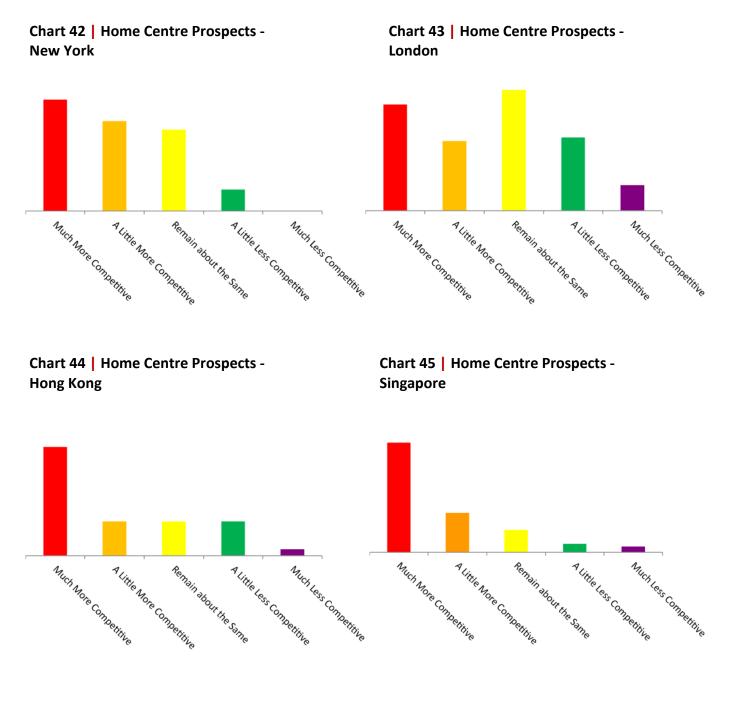

Home Centre Prospects

While the GFCI is calculated using only assessments from people based in other centres, we ask survey respondents about the prospects of the centre in which they are based, and specifically whether their 'home' centre will become more or less competitive.

In general, people are more optimistic about the future of their own centre than people outside that centre. In London, compared with other leading centres, there is both a high proportion of people who consider that the centre will become much more competitive, and the highest proportion in the four centres which lead the index who feel that London will become less competitive. Those in New York are most confident about the future competitiveness of their centre.

Stability

Chart 46 contrasts the 'spread' or variance of the individual assessments given to each of the top 40 centres with the sensitivity to changes in the instrumental factors.

The chart below shows three bands. If a centre fell in the top right of the chart, it would have a higher sensitivity to changes in the instrumental factors and a higher variance of assessments. These centres have the highest potential for future movement in the index. The stable centres in the bottom left have a lower sensitivity to changes in the instrumental factors and a lower variance of assessments.

We have only plotted the top 40 centres (for clarity) but it is worth noting that most of the centres lower in the index would be in the dynamic and unpredictable areas of the chart if plotted.

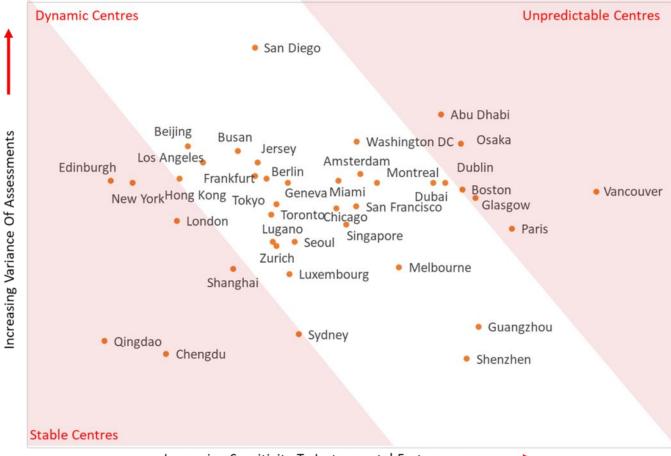

Chart 46 | Stability Of The Top 40 Centres In GFCI 37

Increasing Sensitivity To Instrumental Factors

"High-quality infrastructure, including transportation and technology, is necessary for efficient operations and global connectivity, which are vital for financial centres."

EBU FINANCE MANAGER, ENERGY SECTOR, NEW YORK

In addition, we look at the stability of rankings in the index over time. Chart 47 shows the standard deviation of index rankings against the variance in assessments over the last 24 months. A number of centres in the dynamic area in the most recent analysis in Chart 47 move into the stable area when their rankings and assessments are considered over time.

Chart 47 | Standard Deviation In Index Rankings And Assessments Over Time

Increasing Standard Deviation Of Assessments -

"Not only is the availability of skilled people crucial to the competitiveness of the financial centre but the continuous cultivating of talent and upskilling is an equally, if not more important, factor. Where there is a talent gap in the local labour market, the flexibility to engage foreign talent will be useful in filling the skills gap as well as encouraging skills transfer."

DIRECTOR, PROFESSIONAL SERVICES FIRM, HONG KONG

Reputation

We look at reputation in the GFCI model by examining the difference between the weighted average assessment given to a financial centre and the overall rating in the index.

The first measure reflects the average score a centre receives from financial professionals across the world, adjusted for time, with more recent assessments given more weight (see Appendix 3 for details).

The second measure is the GFCI rating itself, which represents the assessments adjusted to take account of the instrumental factors. A higher average assessment compared to its GFCI rating suggests that respondents view the centre more favourably than quantitative metrics indicate.

Table 14 shows the top 15 centres with the greatest positive difference between the average assessment and the GFCI rating. Nine of the top 15 centres in terms of reputational advantage are in the Asia/Pacific region. Leading centres New York, London, Hong Kong, Singapore, and San Francisco also feature in the list. A high reputational advantage may be due to strong marketing, or awareness of a centre's existing or emerging strengths.

'Reputational advantage' can become a weakness. Centres with a high reputational advantage need to support their successful marketing with genuine improvements in their underlying competitiveness.

| Centre | Weighted Average Assessment | GFCI 37 Rating | GFCI 37 Reputational Advantage |
|-------------------|--------------------------------|----------------|-----------------------------------|
| GIFT City-Gujarat | 857 | 706 | 151 |
| Chengdu | 863 | 713 | 150 |
| Shenzhen | 864 | 743 | 121 |
| Qingdao | 833 | 717 | 116 |
| Hong Kong | 873 | 760 | 113 |
| Nanjing | 752 | 676 | 76 |
| Guangzhou | 783 | 718 | 65 |
| New York | 830 | 769 | 61 |
| London | 819 | 762 | 57 |
| Mauritius | 739 | 694 | 45 |
| Singapore | 791 | 750 | 41 |
| Zurich | 768 | 731 | 37 |
| San Francisco | 784 | 749 | 35 |
| Chicago | 780 | 746 | 34 |
| Xi'an | 695 | 661 | 34 |

Table 14 | GFCI 37 Top 15 Centres Assessments And Ratings — Reputational Advantage

Table 15 shows the 15 centres with the greatest reputational disadvantage. This indicates that respondents' perceptions of a centre are less favourable than the quantitative measures alone would suggest. The centres featured might benefit from a stronger marketing effort as well as tackling some core issues relating to the centre.

| Centre | Weighted Average Assessment | GFCI 37 Rating | GFCI 37 Reputational Advantage |
|-----------------------|--------------------------------|----------------|-----------------------------------|
| Manila | 581 | 649 | -68 |
| San Diego | 644 | 716 | -72 |

Table 15 | GFCI 37 Bottom 15 Centres Assessments And Ratings — Reputational Disadvantage

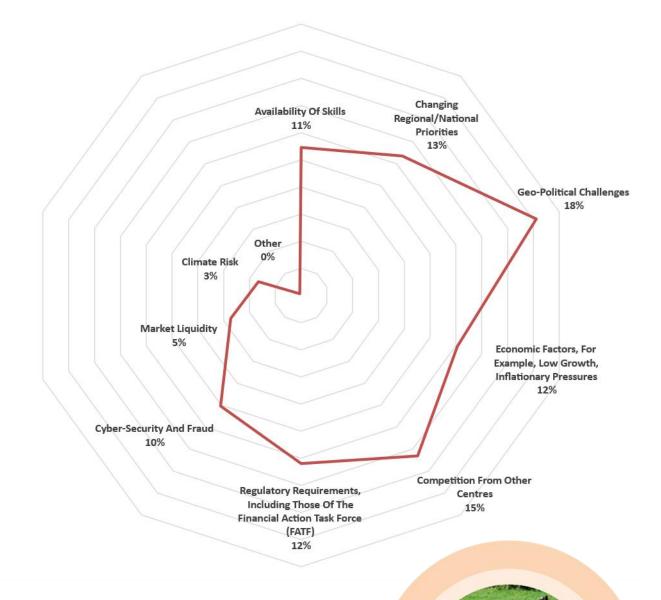

"A robust and transparent regulatory framework is essential for ensuring market stability and fostering investor confidence, which are critical for the competitiveness of financial centres like Abu Dhabi. Strong rule of law and low levels of corruption are vital for creating a trustworthy environment where investments are protected, enhancing Abu Dhabi's appeal as a financial hub."

PROJECT MANAGER, INVESTMENT FIRM, NEW YORK

Financial Centre Challenges

We researched the key challenges facing international financial centres in the medium term for this report. Geo-Political Challenges are clearly seen as the most important risk, followed by Competition From Other Centres, and Changing Regional/National Priorities.

Other challenges identified by respondents were:

- Blockchain / DLT / Tokenisation.
- Cross-border payment platforms.
- International Tax Developments, e.g. BEPS 2.0.
- Technological Disruption.
- Competition.
- Social life.
- Tax regime.

FinTech

Alongside the main GFCI index, we analyse financial centres in terms of their FinTech offering. Table 16 shows the centres that received sufficient assessments to feature in the Fintech index, together with the change in their Fintech rank and ratings since GFCI 36. Chinese and US centres continue to feature strongly, with six US centres and six Chinese centres in the top 20. This reflects their continuing focus on the development of technology applications. New York, London, and Shenzhen lead the FinTech rankings, with Hong Kong overtaking San Francisco to take fourth place. Los Angeles, Singapore, and Seoul maintained their positions at sixth, eighth and tenth place respectively.

Alongside the ratings, we asked survey respondents to identify the four most important elements in generating a competitive environment for FinTech providers. Chart 49 shows the results, with Access To Finance and An Ecosystem Or Cluster That Encourages Innovation leading, with ICT Infrastructure, Demand, and Availability Of Skilled Staff also seen as important.

As well as asking survey respondents about the most important elements in generating a competitive environment for FinTech providers, we also ask them about the most important areas of current FinTech activity. Chart 50 shows the response. Cyber Security takes first place, with Payment Transaction Systems the next most important.

"A stable and transparent regulatory environment fosters trust and reduces risks, making financial centres more attractive to investors and businesses. Low levels of corruption and strong rule of law are critical for ensuring fair practices and protecting investments, which enhances the overall competitiveness of financial centres."

| 50 to 100 | 579 | 12% |
| 100 to 500 | 637 | 13% |
| 500 to 1,000 | 284 | 6% |
| 1,000 to 2,000 | 478 | 10% |
| 2,000 to 5,000 | 344 | 7% |
| More than 5,000 | 1,352 | 27% |
| Total | 4,946 | 100% |

Note: Percentages may not add to 100% due to rounding.

Appendix 3: Methodology

The GFCI provides ratings for financial centres using a 'factor assessment' model. The process involves taking two sets of ratings – one from survey respondents and one generated by a statistical model – and combining them into a single ranking.

For the first set of ratings, the financial centre assessments, respondents use an <u>online questionnaire</u> to rate each financial centre as a place to do business, using a 10 point scale ranging from very poor to excellent. Responses are sought from a range of individuals drawn from the financial services sector.

For the second set of ratings, we use a database of indicators, or instrumental factors, that contains quantitative data about each financial centre. We use a machine learning algorithm to investigate the correlation between the financial centre assessments and these instrumental factors to predict how each respondent would have rated the financial centres they do not know. These instrumental factors draw on data from 86 different sources and cover business environment, human capital, infrastructure, financial sector development, and reputational measures. A full list of the instrumental factors used in the model is in Appendix 4.

Respondents' actual ratings as well as their predicted ratings for the centres they did not rate, are then combined into a single table to produce the ranking.

Factors Affecting The Inclusion Of Centres In The GFCI

The GFCI questionnaire lists a total of 133 financial centres which can be rated by respondents. Financial centres are added to the GFCI questionnaire when they receive five or more mentions in the online questionnaire in response to the question: 'Are there any financial centres that might become significantly more important over the next two to three years?'

A centre is given a GFCI rating and ranking if it receives more than 150 assessments from people based in other centres in the online survey.

Centres in the GFCI that do not receive 50 assessments in a 24 month period are removed and added to the associate list until the number of assessments increases.

Financial Centre Assessments

The GFCI questionnaire has been running continuously since 2007. A link to the questionnaire is emailed to a target list of respondents at regular intervals. Other interested parties can complete the questionnaire by following the link given in GFCI publications.

In calculating the GFCI:

- the score given by a respondent to their home centre, and scores from respondents who do not specify a home centre, are excluded from the model this is designed to prevent home bias;
- financial centre assessments are included in the GFCI model for 24 months after they have been received – we consider this is a period during which assessments maintain their validity;
- respondents rating fewer than three, or more than half of the centres, are excluded from the model; and
- financial centre assessments from the month when the GFCI is created are given full weighting with earlier responses given a reduced weighting on a logarithmic scale as shown in Chart 51 this recognises that older ratings, while still valid, are less likely to be up-to-date.

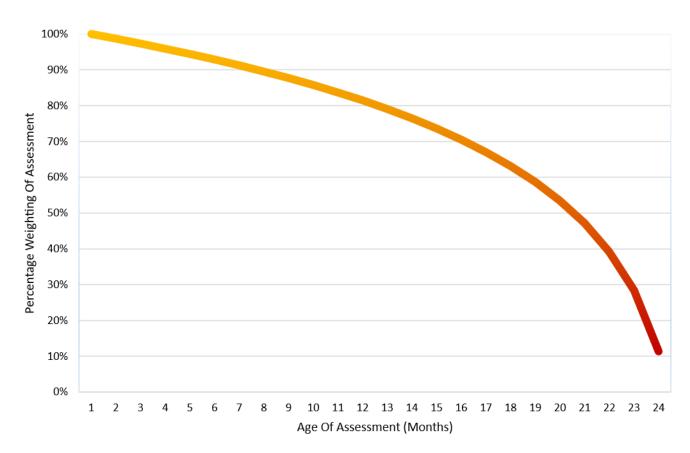

Chart 51 | Reduction In Weighting As Assessments Get Older

Instrumental Factor Data

For the instrumental factors, we have the following data requirements:

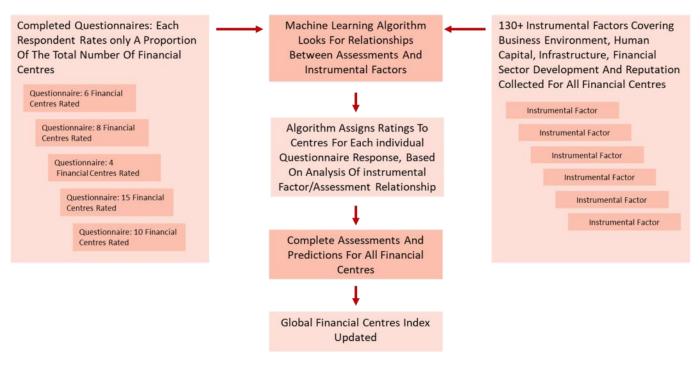

- indices should come from a reputable body and be derived by a sound methodology; and
- indices should be readily available (ideally in the public domain) and be regularly updated.

The rules for the use of instrumental factor data in the GFCI model are as follows:

- updates to the indices are collected and collated every six months;
- no weightings are applied to indices;
- indices are entered into the GFCI model as directly as possible, whether this is a rank, a derived score, a value, a distribution around a mean, or a distribution around a benchmark;
- if a factor is at a national level, the score will be used for all centres in that country; nation-based factors will be avoided if financial centre (city) based factors are available;
- if an index has multiple values for a city or nation, the most relevant value is used (and the method for judging relevance is noted);
- if an index is at a regional level, the most relevant allocation of scores to each centre is made (and the method for judging relevance is noted); and
- if an index does not contain a value for a particular city, a blank is entered against that centre (no average or mean is used).

Details of the methodology can be accessed at <u>https://www.longfinance.net/programmes/financial-centre-futures/global-financial-centres-index/gfci-methodology/</u>. The process of creating the GFCI is outlined in Chart 52.

Vantage Financial

Centres

Vantage Financial Centres is an exclusive network of financial centres around the world run by Z/Yen Partners for organisations looking for a deeper understanding of financial centre competitiveness. Members receive enhanced access to GFCI data, marketing opportunities, and training for centres seeking to enhance their profile and reputation.

Approved by China's State Council, China Development Institute (CDI) was founded in 1989 with 116 representatives from the government, academia and business in China. Being an independent think tank, CDI is committed to develop policy solutions via research and debates that help to advance China's reform and opening-up. After years of development, CDI has become one of the leading think tanks in China. CDI focuses on the studies of open economy and innovation-driven development, regional economy and regional development, industrial policies and industrial development, urbanization and urban development, business strategies and investment decision-making. Via conducting research, CDI provides policy recommendations for the Chinese governments at various levels and develops consultation for corporate sectors at home and abroad. CDI organizes events in different formats that evokes dialogue among scholars, government officials, business people and civil society members around the globe. Based in Shenzhen, Southern China, CDI has one hundred and sixty staff, with an affiliated network that consists of renowned experts from different fields.

> Carol Feng at <u>carolf@cdi.org.cn</u> <u>www.cdi.org.cn</u>

Casablanca Finance City is an African financial and business hub located at the crossroads of continents. Recognized as the leading financial center in Africa, and partner of the largest financial centers in the world, CFC has built a strong and thriving community of members across four major categories: financial companies, regional headquarters of multinationals, service providers and holdings.

CFC offers its members an attractive value proposition and a premium "Doing Business" support that fosters the deployment of their activities in Africa. Driven by the ambition to cater to its community, CFC is committed to promoting its members expertise across the continent, while enabling fruitful business and partnership synergies through its networking platform.

www.casablancafinancecity.com

Kigali International Financial Centre

Kigali International Financial Centre, KIFC, is Rwanda's financial centre facilitating international investment and cross-border transactions in Africa. KIFC was established in 2020 and positions Rwanda as a preferred financial jurisdiction for investments into Africa by providing an attractive destination for investors, with a robust legal and regulatory framework fully compliant with international standards and competitive tax structures, including a network of double tax treaties.

KIFC attracts regional and international investors such as Pan-African based investment funds, asset managers and administrators, regional holding structures, foundations, and global trading firms.

In addition, with its niche focus on Fintech, KIFC offers FinTechs a framework to pilot their business models in a controlled environment before expanding into the wider African market.

Seoul is a rising star among the financial cities of the world. It is already one of the top 10 cities in the world based on various indices, and it has many more opportunities to offer as a financial hub and great growth potential. Seoul believes global financial companies are our true partners for growth. There are many incentives provided to global financial companies that enter into Seoul, such as the financial incentives provided when moving into IFC, so that we can all jointly work towards the growth and development of the financial market.

It is sure that Seoul will become a top star of global financial hubs in the near future! Pay close attention to Seoul's potentials and pre-emptively gain a foothold in the Seoul financial hub. Seoul is the gateway to Northeast Asia and the world.

Financial Centres

The Astana International Financial Centre (AIFC) serves as a leading financial hub in the Central Asian and Eastern European region, integrating advanced capabilities and best practices from prominent financial centres around the world. It is the first in the region to establish a comprehensive legal framework designed to attract, protect, and facilitate investment, grounded in business-friendly laws that reflect the principles, norms, and precedents of the law of England and Wales, as well as the standards of the world's leading financial centres.

The AIFC offers its participants and investors exceptional conditions and opportunities, including an independent judiciary, an IOSCO-recognised regulatory framework, a diverse range of financial services and instruments, streamlined visa and employment procedures, and a zero corporate tax rate for licensed companies.

The AIFC is currently home to over 3,000 companies from 82 countries, including the US, UK, EU, China, Turkey, Hong Kong, Singapore and the Middle East.

Since its inception, investments facilitated through the AIFC platform have exceeded \$12 billion, highlighting its key role in driving economic growth and development in Kazakhstan. www.aifc.kz

Established in 2001, the Financial Services Commission, Mauritius ('FSC') is the integrated regulator for the non-bank financial services sector and global business and is mandated to license, regulate, and supervise the conduct of business activities in the non-bank financial services sector and global business.

Our vision is to be an internationally recognised financial supervisor committed to the sustained development of Mauritius as a sound and competitive financial services centre.

The FSC aims to:

- promote the development, fairness, efficiency and transparency of financial institutions and capital markets;
- suppress crime and malpractices so as to provide protection to members of the public investing in nonbanking financial products; and
- ensure the soundness and stability of the financial system in Mauritius.

fscmauritius@intnet.mu

www.fscmauritius.org

The Long Finance initiative grew out of the London Accord, a 2005 agreement among investment researchers to share environmental, social and governance research with policy-makers and the public. Long Finance was established more formally by Z/Yen Group and Gresham College from 2007 with the aim of exploring long-term thinking across a global network of people.

We work on researching innovative ways of building a more sustainable financial system. In so doing, we try to operate openly and emulate scientific ideals. At the same time, we are looking to create a supportive and caring community where people can truly question the accepted paradigms of risk and reward.

www.longfinance.net

Dubai International Financial Centre (DIFC) is the leading global financial centre in the Middle East, Africa and South Asia (MEASA) region, which comprises 72 countries with a population of three billion and GDP of USD 8 trillion.

With a 17-year track record of facilitating trade and investment flows across MEASA, the Centre connects these fast-growing markets with the economies of Asia, Europe and the Americas through Dubai.

DIFC is home to an internationally recognised, independent regulator and judicial system with an English common law framework, as well as the region's largest financial ecosystem of almost 30,000 professionals working across over 3,600 active registered companies – making up the largest and most diverse pool of industry talent.

The Centre's vision is to drive the Future of Finance (FoF) through cutting-edge technology, innovation, and partnerships. The global FoF and Innovation Hub offers one of the region's most comprehensive FinTech and venture capital environments, including licensing solutions, fit-for-purpose regulation, innovative accelerator programmes, and funding for growth-stage start-ups.

Since 2009 Busan Metropolitan City has been developing a financial hub specialising in maritime finance and derivatives. With its strategic location in the center of the southeast economic block of Korea and the crossroads of a global logistics route, Busan envisions growing into an international financial city in Northeast Asia. Busan Finance Center (BFC) will continue to develop and implement measures to promote Busan as the financial hub and bolster the local financial industry, while working together with various local economic players to pursue sustainable growth of the financial sector including FinTech. These efforts will enable BFC to play a leading role in taking Busan to the next level and become the international financial center and maritime capital of Northeast Asia.

BFC offers an attractive incentive package to global financial leaders and cooperation network of Busan Metropolitan City, and Busan Finance Center will support you to identify opportunities in Busan, one of the fastest developing cities in Asia.

Supported by the industry, the Financial Services Development Council (FSDC) is a high-level, cross-sectoral advisory body to the Hong Kong Special Administrative Region Government.

FSDC formulates proposals to promote the further development of Hong Kong's financial services industry and to map out the strategic direction for the development. As of March 2020, 110 of the 137 policy recommendations had been adopted by the Government and relevant regulators since FSDC's inception in 2013. On top of research, FSDC also carries out market promotion and human capital development functions.

Among others, FSDC focuses on topics including Mainland and international connectivity, green and sustainable finance, FinTech, as well as asset and wealth management.

The <u>Taiwan Academy of Banking and Finance</u> (TABF) is the foremost non-profit institution serving Taiwan's banking industry, and a trusted platform promoting the development and advancement of Taiwan's financial services. Advised by the Financial Supervisory Commission (FSC), it was established in 2000 through the merger of the Banking Institute of the Republic of China (BIROC) and the Banking and Finance Institute (BFI), and remains committed to fostering a modern, resilient, and inclusive financial system for a changing world.

TABF brings together stakeholders across the industry to provide opportunities for talent development, knowledge sharing, and networking. Working closely with both domestic and international partners, TABF provides customized and innovative financial training and certification solutions for the banking sector. Furthermore, it has also been working to improve the financial wellness of the public through financial literacy education, aiming to shape a banking sector that serves all of society.

In a nutshell, TABF is a unique and comprehensive platform committed to fostering a sustainable and inclusive banking industry, making it an essential organization in Taiwan and a valuable partner for the global financial community.

PRODUCED BY Z/YEN

www.zyen.com

Z/Yen helps organisations make better choices – our clients consider us a commercial think-tank that spots, solves and acts. Our name combines Zen and Yen – "a philosophical desire to succeed" – in a ratio, recognising that all decisions are trade-offs. One of Z/Yen's specialisms is the study of the competitiveness of financial centres around the world. A summary of this work is published every six months as the Global Financial Centres Index. Z/Yen also publishes the <u>Global Green Finance Index</u> that seeks to encourage financial centres to become greener and develop financial services in a way that enables society to live within planetary boundaries. Most recently we have developed the <u>Smart</u> <u>Centres Index</u>, which tracks commercial and financial centres' offerings in technology and innovation.

CO-PRODUCED BY CHINA DEVELOPMENT INSITUTE

en.cdi.org.cn

Approved by China's State Council, China Development Institute (CDI) was founded in 1989 with one hundred and sixteen representatives from the government, academia and business in China. Based in Shenzhen, Southern China, CDI has one hundred and sixty staff, with an affiliated network that consists of renowned experts from different fields.

PUBLISHED BY LONG FINANCE AND FINANCIAL CENTRE FUTURES

Long Finance is a Z/Yen initiative designed to address the question **"When would we know our financial system is working?"** This question underlies Long Finance's goal to improve society's understanding and use of finance over the long-term. In contrast to the short-termism that defines today's economic views the Long Finance timeframe is roughly 100 years.

www.globalfinancialcentres.net

Financial Centre Futures is a programme within the Long Finance Initiative that initiates discussion on the changing landscape of global finance. Financial Centre Futures comprises the Global Financial Centres Index, the Global Green Finance Index and other research publications that explore major changes to the way we will live and work in the financial system of the future.
